PROFESSIONAL PROFILE

Product Manager with 12+ years delivering digital products end-to-end. I take ownership from discovery to launch: defining the problem, mapping user and business needs, setting priorities, aligning stakeholders, and making sure what ships actually solves the right thing. My background in product design means I can go deep on UX when needed, but the primary lens is always product decision-making, not execution.

I have reduced scope creep by 45%, compressed delivery cycles by 80%, and improved product engagement by 85% across B2B and B2C projects. I run discovery workshops that leave the team with a shared map of what to build, why, who owns it, and when it ships. I measure success in outcomes, not outputs.

Certified Scrum Master. I use AI daily in my workflow: Claude, Claude Code, ChatGPT, n8n, Lovable and Base44 for research, prototyping, documentation and automation. Open to 100% remote international roles.

PROFESSIONAL EXPERIENCE

Product Manager

ZenderBox · USA / LATAM · 2024 to Present

- Owned the full product lifecycle for ZenderBox, a logistics SaaS serving 24,000+ monthly orders across the US and Latin America: discovery, roadmap, stakeholder alignment, prioritization and delivery.
- Audited the entire digital ecosystem (app, web, dashboards, WMS) and defined a phased redesign plan prioritized by business impact, used to align the Miami-based leadership team on sequencing and resource allocation.
- Defined product vision and feature priorities for the ZenderBox mobile app (iOS and Android), coordinating design, engineering and operations to deliver without disrupting the live production system.
- Led discovery and definition for the WMS and fulfillment dashboards, mapping operational workflows with the warehouse team, translating them into product requirements and a semantic status system that reduced picking errors.
- Established ongoing product health reviews: UX audits with findings ranked by business impact, feeding directly into the quarterly roadmap.
- Built the ZenderHub brand and product design system from scratch, ensuring full design-to-development handoff via JSON design tokens for iOS, Android and web.

Product Design Lead

Thankium · Spain · 2023 to 2026

- Designed and implemented cross-functional design systems that reduced delivery time by 80% and unified the design-to-development handoff.
- Led the discovery and definition phases of each project applying JTBD, User Journey Mapping and Design Sprints. Result: 45% less scope creep.
- Facilitated tailored workshops with stakeholders, developers, frontend engineers, PMs and designers. Each workshop left the team with a system map, required integrations, processes, owners and deadlines, cutting handoff error margins and enabling full team planning from day one.
- Led multidisciplinary teams (design, dev, PM) with 90% on-time delivery and +40% operational efficiency.
- Simultaneous ownership of 10+ web and mobile products across the real estate, sports and services sectors.
- WCAG accessibility audits, integration of AI tools into the design process and ongoing mentorship of junior and mid-level designers.

Senior Product Designer

Thankium · Spain · 2020 to 2023

- Designed end-to-end mobile apps that improved engagement and retention metrics by 85%.
- Worked on complex CRMs and dashboards for clients in the real estate, sports and professional services sectors.

- Conducted WCAG accessibility audits resulting in 30% fewer review rounds.
- Moderated usability testing sessions, produced motion graphics for microinteractions and contributed to team mentorship.

Founder & Product Developer

BONUS® games · Colombia · 2014 to 2019

- Founded and led a board game startup: brand, product, business model and operations.
- Designed from scratch the brand identity, packaging, website and activation materials.
- Designed 5 different products: game mechanics, physical materials, illustration and manuals, each with its own production process.
- Personally supervised the production of every print run.
- Organised product activations in retail and in-person events.
- Scaled the operation to 1M+ customers with presence in national retail and own e-commerce.
- Redesigned the e-commerce, raising online conversion by 25%; the new identity launch generated 30% more pre-orders.

FEATURED PROJECTS

- **Zender Ecosystem, international logistics.** Brand, app, web, dashboards and WMS for a logistics group headquartered in Miami with global hubs. Responsible for discovery, product strategy, UX strategy, design system, product design and full delivery.
- **Private sports clubs, digital transformation.** Replicable booking system and virtual office. After the pilot it was deployed across 6 private clubs with no structural changes. Result: +70% retention and usage.
- **International logistics mobile app, iOS and Android.** End-to-end UX, in-person and remote usability testing, multi-country support with a frictionless cross-border experience. +85% app usage after the redesign.
- **UGT, AI-powered digital enrolment.** AI document verification, chatbot and custom CRM. A 2-day discovery workshop compressed a typical 6+ month process into a 2-month delivery.
- **YUUJU, multi-service contracting.** Multi-profile onboarding (B2B and B2C) and contracting flow redesign. Contracting time reduced by 45%.

SKILLS

Product and UX Strategy Product Strategy · Product Vision · Product Discovery · UX Strategy · User Research · Usability Testing · Service Design · Information Architecture · Interaction Design · Jobs-to-be-Done · User Journey Mapping · Design Sprints · Discovery Workshops · 0-to-1 Product Design

Design Systems & Operations Design Systems · Design Tokens (multi-platform JSON) · Component Libraries · DesignOps · Cross-platform Design (iOS, Android, Web) · WCAG Accessibility · Handoff and Documentation

Product Verticals SaaS · CRM · WMS · Dashboards · Mobile Apps (iOS and Android) · E-commerce · B2B · B2C · Logistics · Real Estate · Sports

Leadership & Strategy Cross-functional team leadership · Designer mentorship · Workshop facilitation · Stakeholder management · Agile · Scrum (cert.) · Roadmap · Multi-product ownership

AI & Automation Claude · Claude Code · ChatGPT · n8n · Lovable · Base44 · AI-augmented Design · No-code prototyping · Workflow automation

TOOLS

Design Figma (Variables, Dev Mode, Auto Layout) · Sketch · Illustrator · Photoshop · After Effects · Miro

Research HotJar · Maze · UserTesting

DevOps Jira · Confluence · Notion · GitHub

AI and automation Claude · Claude Code · ChatGPT · n8n · Lovable · Base44

EDUCATION

Master's in Design Thinking and User Experience · EAE Business School, Madrid (2019 to 2020)

Minor in Scrum Master · EAE Business School, Madrid (2019 to 2020)

Bachelor's in Industrial Design · Pontificia Universidad Javeriana, Colombia (2008 to 2013)

Diploma in Motion Graphics · NASKA DIGITAL, Colombia (2015)

LANGUAGES

Spanish: Native | English: C2 Professional | German: B2 Upper Intermediate

OTHER DISCIPLINES

Industrial Design · Branding · Motion Graphics · UX Auditing · AI Automation
